FARHANA TAJ

AI DATA ANALYST

+91 8919544558 | farhanafara0620@gmail.com | Kuppam, India | linkedin.com/in/farhana-taj-12a5373b1

PROFILE SUMMARY

Detail-oriented AI Data Analyst with hands-on internship experience turning raw datasets into actionable insights using Python, SQL, Excel, and Power BI. Skilled in data cleaning, exploratory data analysis (EDA), and statistical modeling, with practical knowledge of machine learning algorithms and generative AI tools to accelerate data processing and reporting. Demonstrates strong analytical thinking, problem-solving, and communication skills to effectively deliver data-driven solutions to technical and non-technical stakeholders.

CORE SKILLS

DATA ANALYSIS & VISUALIZATION

Data Cleaning & Preprocessing | Exploratory Data Analysis (EDA) | Statistical Analysis | Data Visualization | Dashboard Development | Data Quality | Microsoft Excel | Power BI | Matplotlib | Seaborn

PROGRAMMING & DATABASES

Python | SQL | Pandas | NumPy | REST APIs | Data Extraction

MACHINE LEARNING & AI

Machine Learning | Deep Learning | Predictive Modeling | Scikit-learn | TensorFlow | PyTorch | Model Training & Evaluation | Linear Regression | Random Forest

GENERATIVE AI & NLP

Generative AI | Large Language Models (LLMs) | Prompt Engineering | Natural Language Processing (NLP) | Retrieval-Augmented Generation (RAG) | LangChain | Hugging Face | OpenAI API | AI-Assisted Data Analysis

TOOLS, PLATFORMS & SOFT SKILLS

Git & GitHub | Jupyter Notebook | FastAPI | Docker (Basics) | Analytical Thinking | Problem Solving | Attention to Detail | Communication | Teamwork | Critical Thinking

PROFESSIONAL EXPERIENCE

AI Data Analyst | **InAmigos Foundation** — 1 Month Remote

- Collected, cleaned, and preprocessed raw datasets using Python (Pandas, NumPy) and Excel, improving data accuracy and consistency across analytical pipelines.
- Performed exploratory data analysis (EDA) and statistical analysis to uncover key business trends, patterns, and actionable insights.
- Wrote efficient SQL queries to extract and organize relational data, constructing Power BI dashboards and interactive reports to present key findings.
- Leveraged AI-assisted analytical tools and LLM prompt engineering techniques to significantly speed up data analysis, summarization, and reporting tasks.
- Collaborated effectively with a remote team, sharing regular progress updates and communicating complex analytical insights clearly to non-technical stakeholders.

Artificial Intelligence Intern | **Wayeva Innovation Pvt. Ltd.** — 2 Months Remote

- Developed a strong foundation in Artificial Intelligence and Machine Learning concepts and their practical real-world business applications.
- Worked hands-on with Python, data preprocessing, and exploratory data analysis to prepare clean, structured, model-ready datasets.
- Built, trained, and evaluated predictive machine learning models using core Python libraries such as Scikit-learn.

- Explored Generative AI capabilities, Large Language Models (LLMs), and prompt engineering techniques to construct AI-based applications.
- Applied fundamental AI concepts to practical scenarios, building and testing basic AI solutions while strengthening analytical problem-solving skills.

Machine Learning Intern | **InAmigos Foundation** 1 Month Remote

- Assisted in building baseline machine learning models, conducting exploratory analysis, feature extraction, and basic model evaluation.
- Utilized Python packages (Pandas, NumPy, Scikit-learn) to perform diagnostic data verification and performance validation on test datasets.
- Supported automated data pre-cleaning workflows to optimize repetitive dataset preparation tasks for machine learning tasks.

KEY PROJECTS

Used Car Price Analysis

Technologies: Python, Pandas, Scikit-learn, Power BI

- Collected and cleaned a dataset of 5,000+ used car records, handling missing values and outliers to ensure data quality and integrity.
- Performed comprehensive EDA to identify key factors influencing car prices (vehicle age, mileage, condition, brand).
- Built and evaluated machine learning models (Linear Regression, Random Forest) to predict car prices with 85% accuracy.
- Created interactive Power BI dashboards visualizing price trends, brand comparisons, and depreciation patterns.
- Delivered actionable insights for dealers on competitive pricing strategies and market positioning.

YouTube Video Analytics & Trend Analysis

Technologies: Python, SQL, REST APIs, Matplotlib, Seaborn

- Extracted YouTube data using REST APIs and SQL queries to analyze 2,000+ videos across multiple channels and categories.
- Performed statistical analysis to identify correlations between video duration, upload frequency, and engagement metrics.
- Uncovered trending topics and content patterns, revealing that educational content with an 8–12 minute duration had the highest engagement.
- Visualized findings using Matplotlib and Seaborn, creating compelling charts that show audience retention versus video length.
- Developed recommendations for content creators on optimal video length, posting frequency, and trending topics.

EDUCATION

Bachelor of Computer Applications (BCA)
Kuppam Degree College, Kuppam, Andhra Pradesh, India

CGPA: 8.21 / 10
Expected in 05/2027
